

### Innovations in Kidney Disease Treatments

<b>Session Time</b>	March 24 <sup>th</sup> , 2023 from 1:00 PM ET – 2:00 PM ET
<b>Session Description</b>	Since the Advancing American Kidney Health Initiative put a national spotlight on the public health issue of kidney disease, there has been an imperative to accelerate innovations for potential treatment options for kidney disease patients. These experts will provide an overview of KidneyX and its role in nephrology innovation, discuss the progress made around new advancements in treatment options, including artificial kidneys and xenotransplantation, and share how these breakthroughs will impact patient care.
<b>Key Learning Objectives</b>	<ol style="list-style-type: none"> <li>1. Provide an overview of KidneyX and its role in nephrology innovation</li> <li>2. Discuss the progress made around artificial kidneys and xenotransplantation</li> <li>3. Share about how these advancements in therapies will impact patient care and treatments for individuals with ESRD</li> </ol>

**Moderator:** Carmen Peralta, MD, MAS, FASN, Chief Clinical Officer at Interwell Health

**Speakers:**

- John R. Sedor, MD, Professor of Molecular Medicine, Cleveland Clinic College of Medicine Case Western Reserve University
- Vineeta Kumar, MD, Professor of Medicine and Medical Director of the Incompatible Transplant Program at University of Alabama, Birmingham
- Jonathan Himmelfarb, MD, Professor of Medicine, and Co-Director of Center for Dialysis Innovation at University of Washington
